

# GENROSE

GENROSE Stone + Tile is a design driven company, providing standard, unique, and custom designed surface materials. Our USA manufacturing divisions, which produce handmade ceramic tile, stone fabrication, mosaics, and cut to size tile, act as resources to overcome traditional sourcing obstacles.

We are proud to be one of the few fabricators in Connecticut to be accredited by the Marble Institute of America (MIA), recognizing companies that meet the industry's highest standards for business activities, product knowledge, fabrication, and installation.

## CUSTOM FABRICATION

From residential to commercial, simple to complex, when it comes to stone fabrication, we can do anything! Using a combination of the best technology and equipment in the world together with superior workmanship, we can template, craft, and install the highest quality custom pieces. Even the most tedious and labor intense projects are accomplished by collaborating with more than 50 domestic and international manufacturers with whom we maintain strong relationships.

GENROSE Stone + Tile can provide creative ideas on fabrication or stone surface finishes that include:

CUSTOM MOSAICS

MADE TO ORDER CUSTOM WORK

SANDBLASTING

WATERJET CUTTING

CHANGING A SURFACE OF A SLAB

PERMANENT SEALING OF STONE & HONED QUARTZ

## **CUSTOM DESIGNED SINKS AND DRAINBOARDS CAN BE MADE TO SUIT ANY PROJECT.**

Our mitering and CNC capabilities enable a wide range of styles and applications. Furniture pieces, planters and many other custom projects can be made using these techniques.

It is the vision and attention to detail that makes a design an authentic expression of oneself. What seems like the simplest of choices, may have a profound impact on your design and ultimately define the look and feel of your space.

POLISHED

## SLAB REFINISHING & RESURFACING

We can take any surface and alter it to become a different surface.

Our fabrication department is fully equipped with the highest technology to create the best quality finish on any slab material. To get the desired surface and edge it takes sophisticated polishing CNC machines, special sealants, brushes and bricks, and a highly skilled crew.

With our specialized equipment, we have the ability to change the surface of most stones to a completely different finish, including: polished, honed, leather, satin, suede and bush hammered.

## FOAM-BACKED SLABS

High flexural strength yet lightweight, our proprietary foam-backed slabs are suitable for a number of interior and exterior applications. Some uses are countertops with unsupported overhangs, wall cladding, elevator wall, boats, and exterior wall and floor applications. This material is also UV and acid resistant.

# PERMANENTLY SEALED NATURAL STONE & QUARTZ SLABS

*satin*STONE

SatinStone.com

The **SatinStone™** treatment is a process which permanently reduces the pore size of all surfaces while repelling both water and oil. Resealing is not required. This collection of quartz and natural stone presents an unparalleled color palette, flaunting depth and clarity with a three dimensional quality. Available in a gloss, satin, or suede finish, **SatinStone™** not only looks and feels spectacular, but shines when it comes to high performance as well.

**SatinStone™** Granite and Quartzite outperforms Quartz as it has higher heat and UV resistance, outperforms Porcelain as it is less brittle and therefore less prone to cracking on impact, and outperforms granite as it is more stain resistant.

**SatinStone™** Quartzite that contains calcite has the same attributes as **SatinStone™** granite and quartzite but the treatment will not prevent etching from food acid which does occur to a lesser extent than marble.

**SatinStone™** honed or leathered Quartz outperforms untreated honed and leathered Quartz surfaces as microscopic scratches and pores are reduced to make cleaning simple and easy.

**SatinStone™** Marble and other softer stones will resist staining but are still prone to acid by food acid.

**SATINSTONE™** — A SURFACE YOU MUST SEE  
(AND TOUCH) TO BELIEVE.

# **Azerocare**

---

**Azerocare** is a new natural stone treatment from Antolini, the leading innovative producer of natural stone. **Azerocare** provides enhanced protection from the most common damage to kitchen and bathroom countertops, while preserving the characteristics and color of natural stone. Through an advanced treatment process implemented by Antolini during their preparation of the stone, **Azerocare** marble countertops offer enhanced stain-resistance, etch-protection and UV-resistance, providing a bacteriostatic, easy-to-clean solution for busy people on the go.\*

There is no such thing as a completely etch or stain-proof countertop. However, the **Azerocare** treatment produces a highly stain-resistant surface, and, for a limited period of time, is able to protect against etching from most acidic foods such as: wine, power drinks, tomato sauce, vinegar and lemon juice that can damage untreated stone.

The **Azerocare** treatment streamlines the maintenance requirements for the stone by imparting upon it bacteriostatic properties, which means that bacteria will be stopped from reproducing on the stone's surface – perfect for kitchens or bathroom vanities where spills and splashes are inevitable. This hygienic solution allows the surfaces to be easily cleaned with nothing more than soap and water – no need for harsh chemical cleaners or special polishes.

\* GENROSE recommends cleaning the spill as soon as possible to reduce the chance of staining or etching. In addition, an occasional application of stone polish also provides extra protection against acid-etching or staining.

## CUSTOM MOSAICS

Our Mosaic Department is equipped with cutting edge technology and a highly skilled crew with the mission to meet and exceed the standards for creating beautiful high quality mosaic tiles.

### TILE CUTTING

The linear cutting machine is equipped for cutting any type of ceramic material, glass, marble, and granite to any size.

### MOSAIC MOLDS

After being cut, the pieces are mounted on a special mold that will form the custom mosaic layout. When the layout is complete, all the pieces are inspected and selected to be free of any damage or mismatch, then the mosaic sheet gets mounted for ease of installation.

# MADE TO ORDER FIELD TILES AND MOSAICS:

This represents a small portion of the mosaic patterns we offer. we can cut any field tile to create a custom mosaic or field tile size for you.

GRANITE  
SANDBLASTED

## SANDBLASTING

Sandblasting or Sandcarving is the process of using compressed air and abrasive media to artistically etch or carve an image into the desired surface. Sandblasting is a very diverse process and can be performed in a wide variety of materials such as glass, metal, stone or wood.

### FINISHES

### DESIGN AND PROGRAMMING

Our programmers work with design professionals or homeowners to create shop drawings for any project. Drawings can also be provided by the customer. We have the ability to scan and/or digitize your drawings. Upon completion drawings would then be approved by the customer prior to production.

### MATERIALS

Some materials that can be cut include Stone, Tile, Glass, Metal, Vinyl and Resilient flooring. We work with our customers to determine the proper use of materials and the blending of different materials taking all factors into consideration. We can cut from supplied material or we can supply material for any job.

Our technical experts can also provide recommendations for installation materials and substrates.

# QUEMERE DESIGNS

THE POSSIBILITIES ARE ENDLESS.

Quemere began in 1987 as a small handmade tile factory. Designs originated from an influence of a small town in Brittany, France. Our products today cater to the requirements of the discerning client while maintaining the old world look and feel of the original designs. Newer, more modern sizes and shapes have been added to the line to provide greater flexibility in design.

Every order is custom made and the full design of the project is glazed at one time to ensure one dye lot for the entire project. This can only be accomplished by a factory that custom makes each order at one time.

The charm of a handmade tile is that each order is unique and can never be replicated. The touch of the person spraying or hand painting the tile gives it a unique shading that cannot be duplicated.

If our 180 colors with 5 glaze choices do not meet a clients requirements, custom colors can be made to order. Custom designs, sizes, and mosaics can be made for a client and the design can be stored for their own use not to be sold elsewhere.
